RESPONSE

This is in response to the Office Action mailed on December 3, 2002, in connection with the above-identified patent application. Applicants elect for examination purposes species in which D^+ is protonated aromatic heterocyclic amine and E^- is tetrazolide anion. The requirement is traversed, however, at least in major part. As for element D^+ , the groups identified by the Examiner and labeled A through E are all quaternized amine species and should be searchable without difficulty. Appertaining to element E^- , Groups A and B are closely related and should be easily searched together. At least partial recombination at this time is both efficient and appropriate and such action is requested.

The undersigned has noted a misnumbering in the claims at Page 60. For simplicity and to permit the examiner to proceed without delay, it is suggested that he informally renumber the second occurrence of Claims 51 and 52 as "Claim 52A and Claim 52B." The undersigned will make full correction with the next formal submission.

Respectfully Submitted,

John W. Caldwell
